## DETAILED ACTION

### *Response to After Final Rejection*

1. This Office Action is in response to Applicant's response to Final Office Action dated August 30, 2004 in response to USPTO Final Office Action dated May 27, 2004.

The cancellation of claim 1 and the minor amendment to claim 9 are sufficient to place the application in a condition for allowance as indicated hereinbelow.

### *Allowable Subject Matter*

2. Claims 2-12 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Relative to claim 2, the major difference between the teachings of the prior art of record (Fujimoto, USP 5,473,348; Matsumoto, USP 5,929,839 and Tanaka et al. 6,320,778) and that of the instant invention is that said prior art of record **does not teach** a display control apparatus wherein at completion of writing the previous palette data to the color palette memory, the first video memory controller retains the previous address data designating the previous palette data in a register, so that the first video memory controller determines whether to replace content of the color palette memory by comparison between the present address data and the previous address data.

Regarding claim 3, the major difference between the teachings of the said prior art of record and that of the instant invention is that said prior art of record **does not teach** a display control apparatus wherein the video memory stores a color palette replacer instruction, so that if the

color pallet replacer instruction designate the color palette replacement, the first video memory controller proceeds to replacement of the content of the color palette memory unconditionally regardless of the address data.

Relative to claim 4, the major difference between the teaching of the said prior art of record and that of the instant invention is that said prior art **does not teach** a display control apparatus wherein a color palette replace signal generator for generating a color palette replacer signal based on the header data so as to make a determination whether to replace content of the color palette with respect to each of the planes, wherein if the color palette replacer instruction designates color palette replacement, the video memory controller unconditionally replaces previous palette data with present palette data on the color palette memory, while if the color palette replacer instruction does not designate color palette replacement, the video memory controller replaces the previous palette data with the present pallet data on the color palette memory only when a present color palette pointer designating the present palette data differs from a previous color-pallet pointer designating the previous palette data.

As to claim 6, the major difference between the teachings of the said prior art of record and that of the instant invention is that said prior art of record **does not teach** a display control apparatus wherein if the color palette replacer instruction designates the color palette replacement, the first video memory controller proceeds to replacement of the content of the color palette memory unconditionally, regardless of the present or previous address data.

Art Unit: 2673

Regarding claim 7, the major difference between the teachings of the said prior art of record and that of the instant invention is that said prior art of record **does not teach** a display control apparatus wherein if the color palette replacer instruction designates the color palette replacement and the bitmap data format indicator indicates the color data includes color codes, the first video memory controller proceeds to replace the content of the color palette memory unconditionally, regardless of a present address data or a previous address data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
